Investment objective

The objective of the FCP, which falls into the AMF's "bonds and other debt securities denominated in euro" classification, is to outperform the FTSE EMU Government Bond Index (EGBI) benchmark over the recommended investment horizon, excluding management fees. Main risks

- The Fund's unit value can go up as well as down, and any capital invested in the Fund may be at risk.
- The Fund invests in bonds whose value generally falls when interest rates rise. This risk is typically greater the longer the maturity of a bond investment and the higher its credit quality. The issuers of certain bonds, could become unwilling or unable to make payments on their bonds and default. Bonds that are in default may become hard to sell or worthless.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.
